

Aerotechnik E. Siegwart Quality is colorful!

From gray to yay

Colors come into play with our parts

High-quality fittings for ambitious designs

Discover our high-quality and customized solutions for your interior design.

Our painted fittings and ducts offer the perfect combination of functionality and aesthetics for shops, restaurants, public facilities, and all rooms that should be representative, inviting, and attractive.

Product characteristics at a glance:

- **Painting :** Individual adjustment to your wishes with powder coating in all standard RAL colors, optionally matt or shining.
- **Product variety:** Our range of painted parts includes spiral ducts, plain ducts, bends at 45° and 90°, reducers, T-pieces, flange connectors, male and female couplings.
- **Flexibility in application:** Our products are perfect for visible installations that should be aesthetically pleasing.
- **Customized offers:** Prices and delivery times are available on request.

Painting of the parts only possible on the outside; At the push-fit ends, a light coating of the inside of the fitting or duct cannot be completely avoided for manufacturing reasons.

The following products are only available as an unpainted version: fittings with 45° outlets, cross pieces, Y-pieces, segment bends and parts with a diameter of more than 400 mm.

Many other products from the Aerotechnik E. Siegwart range, such as volume flow controllers, shut-off dampers, throttle valves, multi-leaf dampers and weather louvers, are also available in color on request.
